INFORMATION**

Key operations are the foundation for work that follows; and not only is it necessary to have fast production, but also accurate results. With the Mattison Two-O-Two Ripper and Mattison Moulder you get both. Work comes through uniformly accurate insuring proper fitting of all parts and giving your products that look of quality that comes from precise fabrication methods. Fast produc-

tion, fewer rejects and less waste provides lower production costs and helps considerably to keep the price of your finished product down.

It will pay you to get all the facts on these two machines; and with conditions such as they are, we recommend that you act promptly not only on present requirements, but on future needs as well.
